## **2009 Wholesale Value of Floriculture Crops Decreased 7 Percent**

**Value of All Production:** The 2009 wholesale value of floriculture crops is down 7 percent from the revised 2008 valuation. The total crop value at wholesale for the 15-State program for all growers with \$10,000 or more in sales is estimated at \$3.83 billion for 2009, compared with \$4.11 billion for 2008. California continues to be the leading State with crops valued at \$935 million, but is down 12 percent from the 2008 value. Florida, the next largest producer, at \$696 million is down 9 percent from the prior year to in wholesale value. These two States account for 43 percent of the 15-State total value. For 2009, the top 5 States are California, Florida, Michigan, North Carolina, and Texas, which account for \$2.53 billion, or 66 percent, of the 15-State total value.

**Number of Producers:** The number of producers for 2009, at 6,457, is down 13 percent in the 15 States compared with the revised 2008 count of 7,362. The number of producers with sales of \$100,000 or more dropped 3 percent to 2,919 for 2009 from 3,019 in 2008.

**Area Used for Production:** In the 15-State program, total covered area for floriculture crop production was 806 million square feet. However, these data are not comparable to the 2008 revised area of 756 million square feet due to the combined data collection efforts of the Census of Horticulture and the Annual Floriculture Survey. The data in 2009 include area used for production of nursery crops as well as floriculture crops.

**Peak Hired Workers:** The average peak number of hired workers employed on operations in the 15-State program in 2009 is 18.3. A total of 5,044 operations hired workers during 2009. Overall, 78 percent of operations used some hired labor during 2009. The 2009 hired worker data are not comparable with 2008 data due to the combined data collection efforts of the Census of Horticulture and the Annual Floriculture Survey.

### **Production from Operations with Sales of \$100,000 or More**

**Total Wholesale Value:** The total wholesale value of floriculture crops grown by operations with \$100,000 or more of sales in the 15-State program is \$3.69 billion for 2009, down 6 percent from the revised 2008 total. These largest operations account for 96 percent of the total value of floriculture crops, but comprise only 45 percent of all producers. California contributed 25 percent of the total wholesale value in the 15 States. Florida ranks second with 18 percent; while Michigan, North Carolina, and Texas round out the top 5 States accounting for 10 percent, 7 percent, and 7 percent of the total, respectively.

**Bedding/Garden Plants:** The wholesale value of bedding and garden plants, at \$1.81 billion, is down 2 percent from the previous year. This is the largest contributor to value of production and represents 49 percent of the wholesale value of all the reported crops. California, Michigan, North Carolina, Texas, and Ohio the top 5 States in this category, account for 79 percent of the total 15-State bedding and garden value. The number of growers producing **annual** bedding and garden plants is 1,317, up 1 percent from 2008.

**Potted bedding and garden plants**, both annuals and perennials, are valued at \$1.10 billion for 2009, down 4 percent from 2008. This value represents 61 percent of the bedding and garden category. Potted **annual** bedding and garden plants are valued at \$606 million, up 1 percent from the revised 2008 valuation.

**Potted herbaceous perennials**, valued at \$492 million for 2009, is down 10 percent from 2008. These crops account for 27 percent of the bedding and garden category. The number of growers producing herbaceous potted perennial plants is 1,416, two percent fewer than in 2008.

The value of **annual bedding and garden flats** is up 2 percent from a year earlier to \$501 million. Flats represent 28 percent of the total value for bedding and garden plants.

**Flowering hanging baskets** account for \$209 million in wholesale value, up 7 percent from 2008. Hanging baskets account for 12 percent of the total bedding and garden value.

**Potted Flowering Plants:** Potted flowering plants for indoor or patio uses are valued at \$632 million, down 5 percent from 2008. California accounts for 40 percent of the 15-State value in this category, and Florida accounts for 26 percent. The value of Potted Orchids is \$160 million, up 26 percent from the previous year.

Crops in this category with increased values include florist Easter lilies and orchids. Potted flowering plant producers increased by one percent to 1,259 in 2009.

**Foliage Plants:** The value of 2009 foliage plant production, at \$401 million, is down 12 percent from the previous year at the 15-State level. Florida continues to dominate this category with 67 percent of the value. Potted foliage plants represent 88 percent of the total foliage value. The remainder of the value is from hanging baskets. The number of foliage producers decreased 10 percent to 879 in 2009.

**Cut Flowers:** The wholesale value of domestically produced cut flowers is \$359 million for 2009, 14 percent less than 2008. California's value is \$269 million, accounting for 75 percent of the total cut flower value in the 15-State program. In 2009, the number of producers dropped slightly to 362.

**Cut Cultivated Greens:** Cut cultivated greens wholesale value for 2009, at \$74 million, is down 19 percent from 2008. Florida's value, at \$55.7 million, represents 75 percent of the category total. The number of producers for 2009, at 171, decreased 10 percent from the previous year.

**Propagative Floriculture Materials:** Total value of sales of material for propagating annual bedding and garden plants, potted herbaceous perennials, potted flowering plants, foliage plants, cut flowers, and cut cultivated greens is \$358 million for 2009, down 7 percent from the previous year. The three leading States, Florida, Michigan, and California, account for 61 percent of the 15-State total.

<sup>1</sup> Wholesale value of sales as reported by operations with \$100,000 or more in sales of floriculture crops plus a calculated wholesale value of sales for operations with sales below \$100,000. The value of sales for producers below the \$100,000 level was estimated by multiplying the number of producers in each size group by the mid-point of the sales range.

## Survey Definitions

**Floriculture Crop:** Any item considered in the categories of annual bedding and garden plants, potted herbaceous perennials, potted flowering plants for indoor and patio use, foliage plants for indoor or patio use, cut flowers, cut cultivated greens, and propagative floriculture materials.

**Commercial Producer:** Any operation which produces any floriculture crops in the categories listed above and where gross floriculture crop sales total \$10,000 or more during the calendar year.

**Area Used for Production:** Greenhouse, other covered space, and outdoor area used for the production of floriculture crops. Walkways and aisles are included. Multiple uses of the same area are counted only once, without counting crop turns. Covered area includes glass, rigid plastic and film plastic greenhouses, and shade houses. The area published for 2009 includes nursery production area as well as floriculture production area.

**Quantity Sold:** Represents both retail and wholesale sales in the calendar year shown. Floriculture crops purchased from others for immediate re-sale are excluded. Bedding plant flats are converted to the standard 11-inch x 22-inch flat size.

**Expanded Wholesale Value:** Value of all floriculture crops grown, at wholesale, for operations with sales of floriculture crops of \$10,000 or more. This figure is the sum of the wholesale value of sales as reported by operations with \$100,000 or more in sales and the estimated value for operations with sales between \$10,000 and \$99,999. The value is derived by multiplying the number of producers in each range of sales by the mid-point of the range.

**Value of All Sales at Wholesale:** Equivalent wholesale value of all sales. It is derived by multiplying the average wholesale price by the total quantity sold (both retail and wholesale). Wholesale prices are on a gross basis before deductions for sales commissions, transportation charges, or other similar deductions.

## Survey Procedures

The floriculture statistics presented in this publication are compiled from interviews of all known growers of floriculture crops in the 15 program States. Producers must have annual gross sales of all floriculture crops of \$10,000 or more, to be included in this report.

These results are based upon the 2009 Census of Horticulture Specialties, for which the floriculture related sections have been included on the following pages of this report. During the collection of 2009 data, previous year information was sometimes updated. Additionally, in order to maintain comparability within the 15-State program, data for 2008 and 2009 were collected, where appropriate, from any new operations discovered through ongoing list building activities. Operations are classified by summing the value of actual plant sales reported in the questionnaire. This lessens the possibility that sales of non-floriculture plant material may be included.

The data in this report for annual bedding and garden plants, potted herbaceous perennials, potted flowering plants for indoor and patio use, foliage plants for indoor or patio use, cut flowers, cut cultivated greens, and propagative floriculture materials are summarized only from growers with \$100,000 or more in annual sales. The data summarized in tables showing grower numbers, hired workers, and growing area represent all growers having sales of \$10,000 or more. The area and labor statistics will not be comparable between the two published years as they will include nursery production area and labor for 2009 due to combined data collection efforts with the 2009 Census of Horticulture. The tables showing selected Hawaiian flower crops include data for all operations with sales at, or above, the \$10,000 level.

## SECTION 1 CUT FLOWERS

1. Did this operation produce and sell any cut flowers during 2009?

**INCLUDE:** – Greenhouse and field grown cut flowers.

**EXCLUDE:** – Potted flowering plants for indoor or patio use. Report in SECTION 2.

– Dried bulbs, rhizomes, corms, and tubers to be used for forcing or outdoor use. Report in SECTION 16.

– Unfinished plants (plug seedlings, cuttings, liners, tissue cultured plantlets, etc.). Report in SECTION 17.

401    1  YES – Complete this SECTION    3  NO – Go to SECTION 2

2. For each type of cut flower produced and sold report production and sales. For plants not printed in the table on the next page, enter the plant name and code from the list below. Report number sold in the units specified for each variety (stems, bunches, blooms, sprays or spikes).
